

# JOURNAL ARTICLE Dissemination Form

**Important Note:**

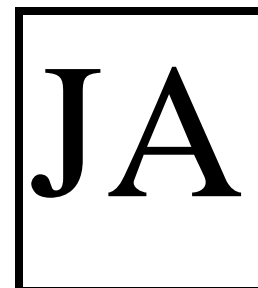

PSFC Reports are distributed both electronically and on paper.  
Contact the Library to receive instructions, procedures and a report number.

PSFC REPORT #:PSFC/JA-\_\_\_\_\_ - \_\_\_\_\_

Title \_\_\_\_\_  
\_\_\_\_\_

Author(s) \_\_\_\_\_

Contractor (DOE, etc.): \_\_\_\_\_ Account #: \_\_\_\_\_  
(Account that will receive ILP credits)

Journal submitted to: \_\_\_\_\_

## Additional Copies

Would you like personal copies?  Yes  No

If yes, how many? \_\_\_\_\_ Charge to account #: \_\_\_\_\_

## Patent Information

Does this report reveal any new equipment, process or material?  Yes  No

## Abstracts

See *Electronic Publishing of PSFC Reports: Instructions for Authors* for information on how to submit your abstract electronically.

## Electronic Format(s)

Please check below the electronic format(s) your report is in (check all that apply):

- HTML
- MS Word
  - IBM/Windows
  - Mac
- TeX
- LaTeX
- PostScript
- PDF
- Other. Please specify \_\_\_\_\_

## Contact Information

Form completed by: \_\_\_\_\_ Room #: \_\_\_\_\_

Phone Extension: \_\_\_\_\_ Email: \_\_\_\_\_ Date: \_\_\_\_\_

**Please complete the *Subject Headings Form* on other side. →**

# PSFC Report Subject Headings & Keyword Indexing

Choose 3 to 5 subject headings from the list below or create your own. Circle any headings you use that are not on the list.

Note that these keywords will be used for electronic retrieval.

If you have any questions about this, please ask a Library staff member.

1. \_\_\_\_\_ 2. \_\_\_\_\_ 3. \_\_\_\_\_

4. \_\_\_\_\_ 5. \_\_\_\_\_

absorption coefficient  
acceleration  
activation & afterheat  
adiabatic invariance  
administration & policy  
advanced fuels  
Alcator C-MOD  
Alfven waves  
alpha particles  
antennas  
astrophysics  
atomic spectra  
beam dump  
beam fusion  
beam plasma interactions  
beams, relativistic electron  
beryllium  
blankets  
boundary layer  
boundary value problems  
charge exchange  
coils  
collisions  
compression  
computational physics  
computer codes  
confinement  
control systems  
controlled fusion  
convection  
coolants  
cross sections  
cryogenics  
cusped geometrics  
cyclotron instability  
cyclotron resonance  
data acquisition  
design  
deuterium  
diagnostics  
diffusion  
disruptions  
distribution functions  
divertors  
drift waves  
economics  
ECR heating  
edge plasma  
electric field effects  
electric power  
electron cyclotron emission  
electron temperature diagnostic  
energy balance  
energy conversion  
energy resources  
energy supply & distribution  
environmental effects  
equilibrium  
finite element method  
first wall

fission reactors  
fluctuations  
Fokker-Planck equation  
free-electron lasers  
fueling  
fusion policy  
fusion power  
fusion reactors  
gas discharges  
geophysics applications  
graphics (computer programs)  
gyrotrons  
H-modes  
harmonics  
heat exchangers  
heating  
helium  
high field  
high-beta plasmas  
hybrid resonance  
hybrids, fusion-fission  
hydrogen  
hydromagnetics  
ICR heating  
ignition  
impurities  
inhomogeneous plasma instabilities  
injection  
ion acoustic waves  
ionization & recombination  
kinetic theory  
laser diagnostics  
laser fusion  
laser-plasma interactions  
lasers  
Lawson criteria  
limiters  
liquid metal properties  
lithium  
lower hybrid heating & current drive  
magnetic fields  
magnetic mirrors  
magnetic surfaces  
magnetics  
magnetohydrodynamics /MHD  
magnetron gun  
magnetrons  
magnets  
materials  
metals & metallurgy  
MHD instability  
microwaves  
mirror reactors  
mode conversion  
Monte Carlo methods

neutral beams  
neutronics  
neutrons  
noncircular cross sections  
nonlinear effects  
nonlinear theory  
nonlinear theory-quasilinear  
nonneutral plasma  
numerical methods  
numerical simulation  
ohmic heating  
optical spectroscopy  
oscillations  
parametric instabilities  
particle dynamics  
pellet injection  
pellets  
pinch  
plasma potential  
plasma spectroscopy  
plasma wall interaction  
positive column  
power plants  
probes (electric, magnetic)  
progress reports  
proposal  
pulsed fusion reactors  
pumps, pumping  
quantum electrodynamics  
radiation  
radiation effects  
radiation generation  
radiation regulations & standards  
radiation scattering  
radioactive waste disposal  
reflectometry  
relativistic plasma  
reliability  
resistive instabilities  
resonance cones  
review  
RF current drive  
RF heating  
robotics  
rotating plasmas  
runaway  
safety  
scaling laws  
sensitivity studies  
sheath  
shielding  
shock waves  
skin effect  
solar energy  
solitons  
splines  
stability, ideal hydro-magnetic  
stability, microinstability  
stabilization

stellarators  
structural materials  
superconducting magnets  
superconductivity  
surface physics  
tandem mirrors  
tearing modes  
Thomson scattering  
tokamaks  
tomography  
torsatron  
transport coefficients  
transport equations  
transport phenomena  
transport theory (neutron & gamma)  
tritium  
turbulence  
vacuum  
viscosity  
Vlasov equation  
walls  
wave absorption  
wave coupling  
wave decay  
wave dumping  
wave excitation  
wave interaction  
wave polarization  
wave propagation  
wave reflection  
wave scattering  
waveguides  
Whistler waves  
x-rays
