

Alcator C-Mod Program Advisory Committee 'Charge'

The current C-Mod five year grant is scheduled for renewal in November, 2003. The MIT proposal for the subsequent five year period (FY04-FY08) will be formally submitted to DoE shortly.

Provide feedback and guidance on our proposed program for these five years, including the goals and priorities, in the context of C-Mod's place in the national and international magnetic fusion programs.

The proposal is scheduled for peer review by an on-site panel in May, 2003. Provide your feedback on our presentations of the proposed program in light of this upcoming review.
