

# Charge to the C-Mod Program Advisory Committee

---

**Miklos Porkolab**  
Director, PSFC

1. Provide guidance on our overall programmatic priorities and objectives, in the context of C-Mod's place in the National and International fusion programs, including considerations of ITER R&D needs.
  
  2. In Spring 2008 we will submit a proposal to DoE for the next 5 year contract period. Please consider our plans with an eye to identifying research opportunities where progress over the next ~12 months could particularly strengthen or inform the proposal.
- Additional suggestions and advice are welcome.
