# Charge for 2004 C-Mod PAC Meeting

---

- Provide guidance on our proposed program in light of critical R&D needs for ITER.
- The first C-Mod lower-hybrid experiments will begin later this year. Consider our near-term (~2 year) plans for Lower Hybrid Current Drive and the AT physics program, and provide feedback.
- Provide advice on our overall programmatic priorities and objectives, in the context of C-Mod's place in the national and international fusion programs.
